REPORT :

The lockdowns during the novel coronavirus disease (COVID-19) pandemic heightened the food crisis for the informal sector workers in India. The loss of income, acute food shortage and bare access to healthcare during the pandemic has not only turned their lives upside down but also has amplified the deep-rooted structural disparity in our country. The poor, who were unsure where their next meal would come from, could not even remain home to protect themselves from the contagion.

SKP college Principal Gnaneshwar sir has taken a decision along with the staff and decided to distribute food to the poor in different places of guntakal town and he prepared 1000 meal packets to distribute to the poor people and went to various colonies in the town along with Teaching and non-teaching staff. The distribution was success and the poor people thanked the college staff for their help.

REPORT

A job fair is an event in which employers, recruiters provide an opportunity to potential employees. In colleges, job fairs are commonly used for entry-level job recruitment. Job seekers use this opportunity to stand out from other applicants and get an overview of what it is like to work for a company or a sector that seems interesting to the applicant.

World Cancer Day held every 4 February is the global uniting initiative led by the Union for International Cancer Control (UICC). By raising worldwide awareness, improving education and catalyzing personal, collective and government action, we are all working together to re-imagine a world where millions of preventable cancer deaths are saved and access to life-saving cancer treatment and care is equitable for all - no matter who you are or where you live. Created in 2000, World Cancer Day has grown into a positive movement for everyone, everywhere to unite under one voice to face one of our greatest challenges in history.

Childhood cancer survival rates are over 80% in high-income countries but as low as 20% in low-income countries. More than 90% of cervical cancer mortality occurs in low- and middle-income countries. Cancer kills nearly 10 million people a year and some 70% of those are aged 65 or older, yet older populations face disproportionate barriers to effective treatment.
